

COMPANY PROFILE FOR AE SHEQ CONSULTING

Safety Consultant

Mission statement and Vision Statement

To become a leader in safety, health, environmental and quality industry by providing reliable and sustainable SHERQ solutions to our clients and overall compliance with the Occupational health and safety Act 85 of 1993 and Regulations.

Company History Founded over three years ago, AE SHEQ Consulting began as a small enterprise dedicated to providing occupational health and safety services to help businesses comply with relevant legislation. Recognizing the challenges that companies face daily in managing occupational health and safety, we sought to deliver tailored solutions to address these concerns. Over time, our company has expanded its offerings to include a comprehensive range of services aligned with the Occupational Health and Safety Act and Regulations. These services include:

- Preparation of Project/ Construction safety files,
- Implementation and developing of SHERQ (Safety, Health, Environment, Risk, and Quality) systems,
- Appointment or Provide Safety officers on site.
- Compliance auditing of health, safety, and environmental system
- Conducting risk assessment and drafting safe work procedures/ method statement
- Supply of personal protective equipment, safety signs, etc.
- Site establishment, construction site compliances and Site Audit and Environmental Compliance and more
- Our commitment to "more" extends beyond compliance. We strive to deliver exceptional customer service, ensuring a seamless.

What we do

We provide holistic and integrated risk management, engineering and safety services to the construction administrative office space, maintaining working environment and civil engineering. We assist companies to reduce health and safety risk in the working environment, as well as providing best practice consultancy to manage the process internally more efficiently.

Safety Consultation/ Site inspection

Our safety consultants will conduct site inspection and baseline risk assessments. On-site Consultation service will help employers identify and address potential hazards in their workplace and establish or improve safety and health programs. Site/ Construction establishment with Construction Requirements/ Regulations.

SHERQ Management

SHERQ system that implemented to improve, protect and sustain the health and safety of all people on the premises of the company. We assist our clients with implementation of SHE Roll-Out Plan, safety standards, construction site safety, SHE plans, emergency preparedness plans, safe work procedures, risk assessments on-site workshops and employee annual safety inductions.

Project Health and Safety File

Our team of professional consultants will assist you in managing your safety file. Conducting safety file workshops across the country. Training will protect employees from injuries, good safety practice and protect employers from criminal liability and prove compliance with the OHS Act.

Our safety specialist is placed on sites to assist both in running safety day-to-day activities and main contractors or subcontractors with all the documentation and updating the safety file. Our specialist will be responsible with employee safety induction, DSTIs, PPE monitoring, managing day-to-day activities on site and attend/ conduct to accidents and incidents writing report, conduct toolbox talks.
